

Get Started:

How to Prepare for an Online Assessment?

Complete the assessments on a **mobile phone, tablet** or a **desktop computer**.

No special prior knowledge or experience is needed to take the test.

It's usually unnecessary to complete all tests in one sitting. **Take your time and take breaks in between.**

It can be helpful to **read the instructions carefully** and go through all of the practice tasks before you begin.

Have a **stable internet connection** the entire time.

Don't worry if you get nervous. "Stage fright" can actually have a positive effect on performance. It channels your attention and mobilizes your energy.

For some of the tests, it may be useful to have a **calculator or pen and paper**. If these are needed the assessment will tell you during the introduction.

What else can you do?

Watch our videos on the individual tests to get comfortable with their look and feel.

Now relax, concentrate and just do your best.
