

Product Manager

What is Product Management?

Product management is the practice of strategically driving the development, market launch, and continual support and improvement of a company's product

Who are Product Managers?

Product Managers are the ones who:

- drive the development of products
- lead by influence not by authority
- are responsible for the success of those products

Why assessments for PM?

Support critical talent decisions for Product Managers through objective and reliable talent measurement specific to the organization across multi-faceted skills and knowledge areas.

How to Identify Talent – Requirements

I need to identify and hire potential candidates for Product Manager for different job roles. I do have a few candidates but:

Do they have idea about Market Research and Customer Development?
Do they know how to design and maintain products?

Are they good at communicating with others?

Are they highly analytical?

Do they possess good problem solving skills?

Are they good at coordinating with people?

Are they good at convincing people?

Are they driven selflessly?

Do they have a curious mind to ideate new products?

Do they know about the basic concepts of Product Management and Product Development Life Cycle?

Do they have relevant technical knowledge?

Are they aware of Agile methodology?

Do they have experience of using any tool(s)?

Are they a culture and role fit or not?

While I need to assess all these but I also want to save my interview bandwidth
How can I do that?
