

How to Prepare for an Online Assessment?

Complete the assessments on a **mobile phone, tablet** or a **desktop computer**.

It is usually unnecessary to complete all tests in one sitting. **Take your time and take breaks in between.**

Have a **stable internet connection** the entire time.

For some of the tests, it may be useful to have a **calculator or pen and paper**. If these are needed the assessment will tell you during the introduction.

No special prior knowledge or experience is needed to take the test.

It can be helpful to **read the instructions carefully** and go through all of the practice tasks before you begin.

Do not worry if you get nervous. “Stage fright” can actually have a positive effect on performance. It channels your attention and mobilizes your energy.

What Else Can You Do?

Watch our [videos](#) on the individual tests to get comfortable with their look and feel.

Now Relax, Concentrate and Just Do Your Best.
